WORK HISTORY

Data Analyst Intern

Web Host Designing · Dec 2023 - Feb 2024

- Developed reports using Excel and Tableau from Google Analytics data.
- Assisted the team in analyzing client's business nature, conducting website analysis, managing report history, and documenting findings.
- Conducted keyword analysis to enhance data insights.
- Created social media analysis reports for clients and competitors.

Data Analyst Intern

MIST IT · Jan 2023 - Mar 2023

- Established data and reporting infrastructure using Tableau and SQL, enabling real-time insights into product and marketing funnels.
- Developed and managed reporting for customer satisfaction using Python, SQL, and Excel, resulting in positive feedback on surveys for friendliness and efficiency, leading to increased repeat customers.
- Utilized Power BI and Tableau dashboards to facilitate client understanding of scenarios.
- Created operational reporting in Tableau to identify areas of improvement for clients and internal company projects.

Juinior business development executive

AIESEC · Aug 2022 - Jan 2023

- Managed analysis and data handling for NISARG, an event encompassing clean-up drives in every city of Navi Mumbai.
- Managed customer data and Corporate Social Responsibility (CSR) data using Excel for multiple companies.
- Organized an event in collaboration with AIESEC at an orphanage, providing essential supplies such as food, clothing, and other necessities to children. This experience demonstrates strong organizational and coordination skills, as well as a commitment to community outreach and social responsibility.
